PROFESSIONAL EXPERIENCE

Software Engineer, Raykor Technologies Pvt. Ltd. | Pune District, Maharashtra (On-site) Apr 2025 - Present

- Built and shipped a multi-tenant Angular application used daily by client operators.
- Designed and implemented REST APIs with Node.js and Express.js on PostgreSQL and OrientDB; owned the release pipeline and on-call rotation.
- Built reusable components that improved maintainability; worked with cross-functional teams on requirements, debugging, testing and code reviews.

Full Stack Developer Intern, RacksonsIT Developers Pvt. Ltd. Jan 2024 - Aug 2024

- Gathered client requirements and delivered a responsive, cross-browser website with React, Tailwind CSS, Node.js and Express.js, from UI design to deployment.

Android Developer Intern, QSective Solutions Jul 2022 - Aug 2022

- Implemented UI components in Java for an internal Android tool and integrated REST endpoints with local storage.

PROJECTS

Glidr Screen - Remote PC Viewer and Controller Oct 2026
Kotlin, Jetpack Compose, WebRTC, Electron, Node.js | github.com/yashraj-shitole/GlidrScreen

- Built peer-to-peer PC screen streaming at 24 fps (hardware H.264) over WebRTC with no media server; QR-code pairing and AES-256-GCM sealed signaling with HKDF-SHA256 keys.
- Developed the Electron Windows host (native SendInput) and a reusable Android viewer library with trackpad, multi-monitor switching and Unicode typing; validated by an end-to-end self-test and crypto unit tests.

Glidr - Phone as Bluetooth Mouse, Keyboard and Media Remote Oct 2026
Kotlin, Jetpack Compose, Bluetooth HID, C# .NET 8, three.js | github.com/yashraj-shitole/Glidr

- Built an Android app acting as a Bluetooth HID device with batched, allocation-free 125 Hz input reports, a foreground service and US, UK and DE layouts; covered by unit and Compose UI tests.
- Built a .NET 8 tray companion (now-playing sync over Bluetooth RFCOMM) and a three.js launch page; published v1.0.0 and v1.1.0 on GitHub.

Project Athena - AI Assistant with Tool Calling and RAG 2026
Python, FastAPI, PostgreSQL, Ollama (Qwen2.5) | github.com/yashraj-shitole/project-athena

- Implemented hybrid keyword and vector retrieval over PDF, DOCX and CSV files with citation-aware answers and a provider-agnostic tool registry on a local LLM.
